

Provides a manufacturing solution including suggested works orders, suggested purchase orders and more.

Material & Resource Planning for Sage 200

Key Product Functionality

Material Planning

- Create suggested works orders and suggested purchase orders to replenish stock shortages now and planned into the future.
- Shortages are derived from outstanding works orders, sales orders, kits, stock transfers purchase orders, fore Orders and min stock levels.
- Purchase order suggestions are driven by supplier lead time, usual and min order quantities.
- Works order due dates are based on supplier and production lead times.

Resource & Capacity Planning

- Link Labour Register items to departments.
- Set available hours per Labour Register item at weekly or daily level.
- Create daily/weekly graphical schedule for labour and machine capacity.
- Graphical drill down plan shows labour and machine availability.
- Drill down to amend works order dates to smooth overloads.
- Calculate the next possible delivery date from sales order processing for manufactured items based on capacities and material availability.
- GANT Chart and critical path for planning production workload.
- Plan capacity by labour, machine and production are Create availabilities for labour and machine resources taking into account shutdown, maintenance periods and holiday.
- Calendar view with drag and drop interface to adjust the production plan by moving works orders and sub-assemblies in real time.
- Daily works order list showing today's, tomorrow and overdue workload.

Licencing Summary

Installed and maintained within Sage 200, using Sage 200 user licences with no Sicon specific user licences required.

Reports are designed within Sage 200 using the built in Sage 200 report designer, meaning they can be amended to provide custom versions of the reports.

Written within the Sage 200 development environment using the Sage business objects and utilising the latest Microsoft technologies for user interface.

When Sicon MRP is installed, the Sage features are updated and these can be added to the Sage user menu's using the Sage System Administration tools.

Available to all Sage 200 users across all Sage companies at no extra cost.

No Sicon user licences required.
