# sicon DATASHEET

A real-time view of project costs and profitability, all from within Sage 200.

Projects for Sage 200

Key Product Functionality

Sicon Projects integrates with Purchase ledger, SOP, POP, Stock, Time Recording & Works Order Processing.

- Create Jobs manually, or automate from Sales Order Processing.
- Enter Purchase invoices and link to one or more jobs.
- SOP and POP lines can be linked to jobs and shown as commitments.
- Stock can be linked to jobs via Stock Control, Internal Issues and Returns. Allocated stock is shown as committed stock usage.
- Complex job structures can be created with linked works orders allowing allocation of stock to jobs and assisting the material planning process.
- Labour is recorded directly into Projects but can be planned on the built in scheduler to create committed labour.
- Detailed WIP reporting included with standard Sage 200 reports.
- 100% reconciliation between nominal ledger transactions and jobs.
- Job enquiry and management screen provide a simple view of jobs, showing all costs, revenues and budgets with drill down to detail and history.
- Instantly identify outstanding sales and purchases as commitments.
- Jobs are quick and simple to setup, just one click will create a job.
- Most data input is carried out in the normal Sage modules removing duplication.
- Budget by cost heading and optionally by period and cost heading.
- Custom job management tabs and fields with linked workspaces available.
- Drill down to sales orders, purchase orders, purchase invoices, stock transactions (works orders when purchased) and any related documents.
- Create phase, stages and sub stages within jobs.
- Integration with other modules: Works Orders can be created and booked to a Project. Time can be booked to job directly from the Sicon Approvals Time & Attendance or Timesheets modules if this solution is purchased with Projects .
- Labour Recording: Recording directly into Projects , via a web interface* or the T&A system*.
- Work In Progress (WIP) management & Job Profitability: Provides a detailed WIP listing and summary total for each job. Detailed WIP & profitability reports are provided with the product.
- Project enquiry and management screen: Provides a simple view of any job, showing all costs and revenues. Drill down to any detail or transaction history. Instantly identify outstanding sales and purchase orders as commitments.
- System Requirements: Projects runs as an additional Sage 200 module so has no additional requirements.
- Easy to learn and easy to use—Screens and processes: are designed for non-IT users.
- Projects are quick and simple to setup: just one click will create a Project.
- Data: most data input is carried out in the normal Sage modules.
- Corrections to job postings: can be made via an adjustments function.
- Overall or detailed budgets: per cost heading (unlimited cost headings).
- Budget by cost and by hours: is available.
- Budget analysis: runs real time and is available on the enquiry screen.

Licencing Summary

Installed and maintained within Sage 200, using Sage 200 user licences with no Sicon specific user licences required.

Reports are designed within Sage 200 using the built in Sage 200 report designer, meaning they can be amended to provide custom versions of the reports.

Written within the Sage 200 development environment using the Sage business objects and utilising the latest Microsoft technologies for user interface.

When Sicon Projects is installed, the Sage features are updated and these can be added to the Sage user menu's using the Sage System Administration tools.

Available to all Sage 200 users across all Sage companies at no extra cost.

No Sicon user licences required.
