What will I need installed to make this work?

- Sage 200 installed with the Sage 200 Commercial modules.
- The Sicon Web API installed.
- The Sicon SFDC Add-On in Sage.
- The Sicon SFDC App installed on the tablet.
- Sicon Manufacturing or Sicon Projects installed

Note: Sicon SFDC does not include the wireless network infrastructure or the hardware devices. These are up to each client to decide what they need and how best to implement it. We are happy to offer advice and recommendations where it is required.

Licencing Summary

The Sicon SFDC module is installed and maintained within Sage 200.

The Sicon SFDC App requires a licence for each named external App user.

Reports are designed within Sage 200 using the built in Sage 200 report designer, meaning they can be amended to provide custom versions of the reports.

Written within the Sage 200 development environment using the Sage business objects and utilising the latest Microsoft technologies for user interface.

When Sicon SFDC is installed, the Sage features are updated and these can be added to the Sage user menu's using the Sage System Administration tools.

Available to all Sage 200 users across all Sage companies at no extra cost.
